Teaching-learning methods:

☒ Lecture

☒ Group Work

☒ Practical Work

☒ Seminar

☒ Using electronic resources

☒ Other

The syllabus of each course provided by the Bachelor Program provides ways (methods) to achieve the goal of the specific course, which is based on the principles of student-centered teaching. The teaching-learning methods provided by the syllabus of each course are focused not only on acquiring knowledge, but also on developing skills.

The courses of the Bachelor Program include the specific teaching-learning methods specific of the subject. The teaching-learning methods reflected in the syllabus of each course correspond the level of education and the goals and content of each study course. The teaching-learning methods, based on the specifics of the course, ensure the achievement of the outcomes provided by the syllabus of the course, and the set of existing teaching methods - the achievement of the learning outcomes provided by the program.

The teaching-learning methods may include appropriate activities: discussion/debate, cooperative learning, collaborative work, demonstration, explanation, verbal, deduction, induction, analysis, brainstorming, case study, problem-based learning (PBL) and more.

Academic and invited staff implementing the program may use one or more of the above activities or any other activity depending on the specific learning task.

Evaluation system for student knowledge:

The learning component of Bachelor Program of Law encompasses students' active participation in the teaching process and is based on the principle of continuous assessment of acquired knowledge.

Assessment of acquired knowledge of the program is organized in accordance with the Order No. 3 by the Minister of Education and Science of Georgia, January 5th, 2007 - "The Rule of Calculation of Higher Education Program Credits".

Evaluation of student's learning results in each component of the program must include mid-term (Onetime or Multiple) and summative evaluation, the sum of which constitutes final assessment (100 Points).

Mid-term and summative evaluations (Evaluation forms) include evaluation component/components, which determine ways/methods to assess student's knowledge and/or skill and/or competence (Written/verbal Exam, written/verbal quiz, homework, practical/theoretical work, etc.). Assessment component unites homogeneous assessment methods (Test, essay, demonstration, presentation, discussion, practical/theoretical assignment, working in a team, participating in a discussion, solving a case, participating in moot court competitions, etc.). Assessment method/methods are measured by assessment criteria, on the basis of which the level of achievement of learning outcomes is being measured.

Each assessment form and component has certain value allocated from the final score (100 Points) that is indicated in each Syllabus and is being communicated to students during the beginning of the academic semester.

Credits shall not be awarded by using only one form of evaluation (mid-term or summative evaluation). Student will be granted a credit only on the basis of positive assessment.

The student is considered to have evaluated the intermediate and final component only if the received score is 30% of the maximum score of the component/components and/or more.

Under the evaluation system there are five types of positive evaluation:

- (A) Excellent –91-100 points of evaluation;
- (B) Very good –81-90 points of evaluation;
- (C) Good – 71-80 points of evaluation;
- (D) Satisfactory –61-70 points of evaluation;
- (E) Sufficient –51-60 points of evaluation.

Two types of negative evaluation:

(FX) Did not pass – 41-50 out of the maximum evaluation, which means that the student needs to work more to pass the examination and he/she shall be given the possibility to retake the examination after the self-study;

(F) Fail – 40 points or less out of the maximum evaluation, which means that the work done by the student is not enough and he/she has to retake the course.

In case of (FX) evaluation in any component of the educational program, the University must hold an additional examination within not later than 5 days after the announcement of the results of the summative examination. This obligation shall not apply to the dissertation, Master's project/thesis or other scientific project/paper. The points, awarded to the student in the summative evaluation, shall not be added to the evaluation of the student at the additional examination. The evaluation obtained by the student at the additional examination is the summative evaluation and shall be included in the final evaluation of the component of the educational program. In case of taking 0-50 points in the final evaluation, including the evaluation obtained at the additional examination, the student evaluation will be F-0 points.

The calculation of the Grade Point Average (GPA) is part of the system of evaluation of the student's knowledge. The student's Grade Point Average (GPA) is calculated by multiplying the evaluation, obtained by the student in every subject of the educational program, to the credits of that subject. The product of multiplication of the subjects and credits is summed up and divided by the total number of the credits of the taken subjects. The weight of the point in the calculation of the average number is:

A = 4

B = 3, 2

C = 2, 4

D = 1, 6

E = 0, 8

Employment:

Graduates of the Bachelor of Law Program will be able to use the acquired knowledge, both in private and in state and international structures, where the academic degree of bachelor of law is required and it is not necessary to pass the state qualification exam. The program provides in-depth theoretical knowledge as well as practical experience, which gives graduates the opportunity to start a successful career in the legal field. In addition, graduates can continue their studies on a Master's degree program focused on preparing a higher-level specialist or researcher.

Graduates of the Bachelor's Program will be able to pass the state qualification exam, which is mandatory for admission to the High School of Justice, as well as for the position of lawyer and prosecutor.

Possibility of continuing education:

Graduates of the Bachelor's Program in Law can continue their studying process in the higher educational institutions of Georgia or other countries on the Master's Degree Program in the field of law.

Graduates can also continue their studies on a Master's Degree Program in any field, if the prerequisite for admission to the specific program is not limited to a Bachelor's Degree in another specialty.

Human resources necessary for the program implementation:

Sufficient human resources are being involved in the implementation of the program. Courses from the educational program are being led by academic personnel of the University, as well as invited specialists with sufficient experience and competence.

For more information on human resources, see №1 Appendix.

Material resources necessary for the program implementation:

To achieve the learning outcomes of the Bachelor's Program in International Law, the University infrastructure, material and technical resources available to students without restrictions will be used, in particular:

Academic auditoriums and conference halls equipped with appropriate inventory;

Library, equipped with computer hardware and informational-communicational technologies;

Computer classes, computer hardware connected to internet and internal network and adequate computer software in learning/teaching process;

Different technical equipment etc.

The educational program is provided with appropriate literature. The University's library provides students with electronic textbooks relevant to the syllabus, educational and scientific literature, as well as the library's database.

Material resources owned and possessed by the University, ensures the realization of the goals of the Bachelor's Program in Law to implement its objectives and achieve planned learning outcomes:

Buildings and Structures - the Bachelor's Program in Law is carried out in the building owned and leased by the university, where sanitary-hygienic and safety norms are highly respected (the buildings are equipped with installed alarms, fire extinguishers, video control system takes place on the perimeter, order is maintained by the custodial servant of the university). The building is in full accordance with the technical requirements established for the institutions, lecturing and practicum auditoriums are equipped with relevant technique and inventory (projector, chairs, desks, boards et cetera).

Library - In the library of the University the relevant printed and electronic fund of the Bachelor's Program in Law is preserved, which is available for the students, invited and academic personnel. In the reading hall, students have the opportunity to use internet and international electronic resources (EBSCO; JSTOR; Cambridge Journals Online; BioOne Complete; e-Duke Journals Scholarly Collection; Edward Elgar Publishing Journals and Development Studies e-books; IMechE Journals; New England Journal of Medicine; Open edition Journals; Royal Society Journals Collection; SAGE Premier). The library of the university has E-catalogue.

Working Space of Academic Personnel - The working space of academic personnel is equipped with the relevant inventory and technical equipment (chairs, tables, wardrobes, computers with the access to internet, Xerox multifunctional machine).

Information and communication technologies - The University uses information and communication technologies in order to facilitate the implementation and administration of bachelor's educational program in Digital Media and Communication. There is a corresponding software for the bachelor's educational program in Communication, the existing computer hardware meets the contemporary requirements, is connected to the internet and is available for students, academic, invited and administration personnel. Electronic system – lmb.gipa.ge – is used for assessing student's knowledge and to coordinate teaching process. The system provides students with access to assessments, facilitates the control of academic attendance of students and the learning process in general. Through the web-page, which contains information about the educational programs and the learning process, the University provides publicity and accessibility of information.

Curriculum Map

For each outcome of the program, a three-level knowledge hierarchy was defined: I, D, M, where I means reaching outcome on an introductory level, D - demonstrates development, M - means mastering a student.

The table below demonstrates list of subjects offered by the program with the level of achievement of particular outcome. In the column next to each outcome the benchmark is presented. The given percentage indicates benchmark for receiving passing grade in a given subject. The acceptable deviation is 15% for each benchmark.

Subject/module	A	B	C	D	E	F	G	H
Academic Writing					IP (conserning general analitical skills)	IP		
Logic		IP					I	
Introduction to Political Science		I (conserning general analitical skills)			I (conserning general analitical skills)		I
